

Web Application Architectures

Module 2: Ruby on Rails

Lecture 2: Your First Rails App

THE UNIVERSITY *of*
NEW MEXICO

On a machine with a working Rails installation:

1. Open up a terminal window, and at the command prompt (\$) type:

```
$ rails new my_app
```

2. Change to the application directory (RAILS.root):

```
$ cd my_app
```

3. Start the web server:

```
$ rails server
```

4. Open a browser window and navigate to:

<http://localhost:3000>
